

PERFECT PARKING

Front Parking Sensors

Great Coverage

4 sensors provides comprehensive coverage of front bumper

High Quality

Allows greater awareness of potential hazards in your surroundings

Discreet Design

Colour coded sensor heads to match vehicle paintwork

For increased confidence with precision parking or tight driving situations.

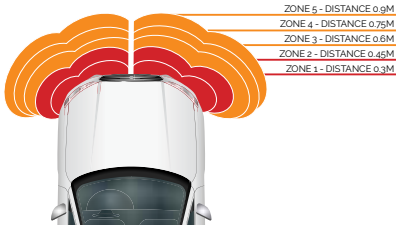

FRONT PARKING SENSORS

Increase safety and enable faster and easier parking, especially in tight situations. These ultrasonic sensors monitor the distance from your vehicle to potential obstacles.

Key Features

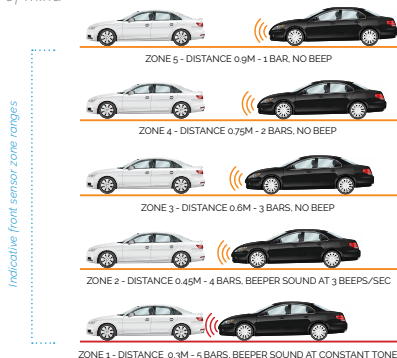

Comprehensive coverage

- Front sensors feature 5 zones, with an alert warning on the last zone. The sensors range from 1 metre down to 0.3 metres
- Provides a visual guide by illuminating LEDs. Orange LEDs indicate something is in 90cm proximity and is silent. When the vehicle is within 45cm of an object and the first red LEDs are illuminated on one or both sides of the display, the driver will hear several audible tones. Once vehicle approaches 30cm from an object, 2 red LEDs will be illuminated and a constant audible tone will be heard
- Professionally installed by a trained Technician
- Comes with a 3 year nationwide warranty*

Benefits

Peace of mind

- Four front sensors, with a maximum range of 90cm, provide a full range coverage, which means ultimate peace of mind
- Sensor heads colour coded to match vehicle paintwork*
- Electronically scans the area ahead of your vehicle during parking procedures and visually alarms you to other vehicles or objects within close proximity
- Provides side protection for narrow lanes, tight parking spaces or garages

*Warranty terms, conditions and exclusions apply.

*Applicable to plastic bumpers only.
