

THE NEXT EVOLUTION IN UHF CB RADIO IS HERE

XRS™ Connect - Bluetooth Enabled UHF CB Radio

Innovation at its Best

The XRS™ Connect App combines easy-to-navigate menus with the familiar technology of a smart device to control the features and settings of the radio

Developed Using Latest Technology

The professional grade speaker microphone features a powerful 2 watt speaker, customisable buttons and a high contrast OLED screen guaranteeing crystal clear, anti-glare display

Rugged & Australian Made

The XRS™ UHF CB radio is uniquely designed, engineered and built in Australia to withstand the harsh Australian conditions

The first ever UHF CB radio with app control and other unique features never before seen.

XRS™ CONNECT BLUETOOTH ENABLED UHF CB RADIO

The XRS™ family is a new Australian Made radio platform designed to be smart, adaptable and rugged. Enabled by Bluetooth® wireless technology, XRS™ offers the first ever app designed for UHF CB radio and introduces new features such as: creating and sharing scan lists and instant access to the entire Australian and New Zealand registered analogue frequency database.

Key Features

Comes with mounting cradle and microphone bracket

- Bluetooth wireless technology
- End user software upgradeable via the dedicated XRS™ Connect App*, available on Google Play or the App Store
- Easy to configure and customise radio via the App
- Instant access to over 20,000 receive frequencies
- XRS™ Connect speaker microphone with OLED display
- The XRS™ microphone has two customisable buttons which can be assigned most radio functions
- Diecast chassis metal construction
- Professionally installed by a trained Technician
- Comes with a 3 year nationwide warranty* + 1 additional year for downloading and registering App

Benefits

Compact hideaway design

- Speaker microphone is designed for noisy environments and houses a 2 watt speaker for clearer and more robust sound
- Equipped with ScanSuite for virtual private group communications. With super-fast scan, this CB radio can now scan 25% faster than previous generations and up to 4x faster than competitor radios#
- Create any combination of up to 400 frequencies in 8 scan lists (zones), including frequencies anywhere between 403–520 MHz and store them in your app for simple, easy access. The lists can then be shared with any other XRS Connect radio user
- Easy reset feature, to clear any accidental changes
- The microphone has been tested to over 1,000,000 PTT cycles and the professional grade strain relief and OLED screen make this microphone as durable as they come
- The radio's software can be upgraded using the internet connection of your smart device. Notifications of new features and upgrades will be available via the app

*Warranty terms, conditions and exclusions apply. #XRS™ radios scan at 50 channels per second on CB frequencies active. *App compatible with iOS9.0, Android 5.0 and above. Windows app compatible with 7.0 and above.
