vehicle is fully protected

Leading features. First class design. One of the most discreet on the market.

VEHICLE DRIVE RECORDER

An essential dash cam that records every drive in full HD quality, including superior night-time vision. The device can also record even while the car is parked[#], and is available with an optional power management system that checks your vehicle's battery voltage periodically, helping to save your vehicle's battery life.

Key Features

Comes with a 32GB SD card[^]

- Built in GPS and WiFi: GPS provides speed recording and tracks travel via Google Maps. WiFi allows for viewing a live feed, downloading footage and adjusting settings.
- SD card allows for easy viewing of captured footage on a PC, adjusting user options, playback footage in slow motion and more.
- Dedicated App (available via iOS and Android) for reviewing captured footage.
- Available as front or dual (front and rear) configuration.
- Professionally installed by a trained Technician.
- Comes with a 3 year nationwide warranty^{*}

Benefits

Your best eye witness in the event of an accident

- Helps provide evidence in the event of an accident.
- Records both audio and visual footage.
- Records even while the car is parked - the device automatically records when motion or impact is detected. (Note: some vehicles may require the Optional Power Management System identified below to enable Parking Mode)
- In any sudden accident, footage can be replayed immediately via the App.
- Built-in GPS and WiFi makes for a cleaner installation with less cables, and removes the need to take the SD card out for simple tasks.
- Saves and organises files on the microSD card in a way that reduces the need for regular SD card formatting, and prevents file corruption events after long periods of use.

+ Choose the optional Power Management System to provide uninterrupted power to your Vehicle Drive Recorder.

Some vehicles require the Optional Power Management System to enable Parking Mode as a result of manufacturer design. Please ask your Consultant if this applies to your vehicle.

- Works by charging as you drive, then powering your Vehicle Drive Recorder when your car is switched off (does not need to use your existing car battery).
- Extends surveillance recording times, and avoids any potential error warnings, drop-outs, or system interruptions that some new vehicles may be susceptible to.
- 12V and 24V compatibility.

Optional

Power Management System

^{*}Warranty terms, conditions and exclusions apply.

[^]32GB SD card supplied with dual configuration. 16GB SD card supplied with front only configuration.

[#]Some vehicles may also require the Optional Power Management System to enable Parking Mode.
