

SAFER DRIVING

Blind Spot Detection Warning

Great Coverage

Blind spot alert activated up to 40 degrees

High Quality

High standard manufacturing using reliable radar technology

Smart Design

Installed sensor/alert indicators well designed and functional

For the times when you need eyes in the back of your head.

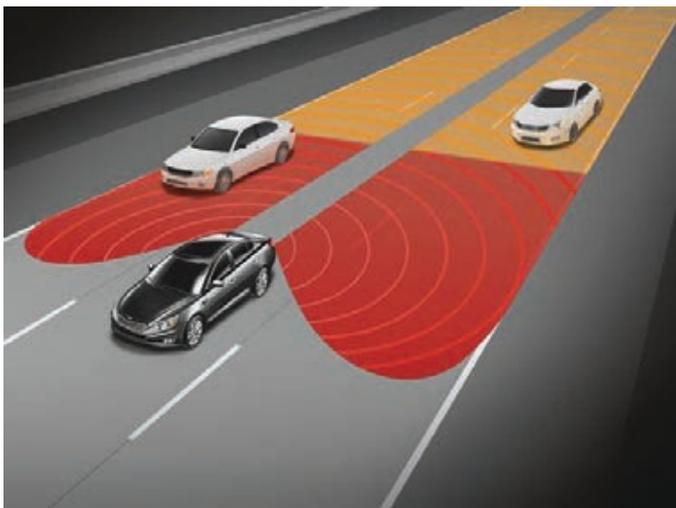

BLIND SPOT DETECTION

Designed to fit most vehicles. Radar blind spot monitoring system alerts you to cars, people or other objects that can easily sneak into your blind spot.

Key Features

Comprehensive coverage

- Using new radar technology, the blind spot detection warning system may assist by accurately detecting unseen vehicles in your vehicle's blind spots.
- Alerts you with a visual warning via an LED indicator light mounted at the bottom of the vehicle's A-pillar.
- An audible alert is triggered if you turn on your indicator and a vehicle is detected in a blind spot.
- IP67 waterproof cables and radar for peace of mind.
- Detect trucks, cars, motorbikes and pedestrians.[^]
- Professionally installed by trained technicians.

Benefits

Peace of mind

- Built in GPS automatically mutes the system under 32km per hour.
- Enhanced confidence during a lane change manoeuvre and more relaxed driving in heavy traffic or busy multi-lane freeways.
- Comes with a 3 year nationwide warranty.*

[^]18m truck, 15m car, 10m motorbike, 7m pedestrian
*Warranty terms, conditions and exclusions apply
